

DI4TEX

Fostering the digital transformation
in the textile industry

Co-funded by
the European Union

www.di4tex.eu

The textiles and clothing manufacturing sector in Europe is facing several challenges; owing to the financial crisis, the competition from emerging markets, the environmental demands, etc., and the crisis generated by COVID-19.

The sector, one of the largest and most important in Europe, needs to reassess its position by assuming the two drivers of competitiveness: **green transition and digital transformation.**

The main objective of DI4TEX is to foster the digital transformation of the textile industry by providing its employees with the required skills to face the current challenges of the sector.

BRIEF COMPANY DESCRIPTION

Cantec Group are an MPS provider who pivoted by introducing automation software into our product portfolio. This led to our acquisition, in 2020, of SmartOffice who specialize in guiding clients through their digital transformation. In 2021, we acquired InShip who developed the ecosystem of SmartOffice products.

CURRENT DIGITALISATION PROFILE

As providers of business process automation solutions, we guide manufacturing SMEs through their digital transformation.

DIGITAL BEST PRACTICES AND LEARNINGS (I.E. PRODUCTION PROCESS IMPROVEMENTS)

Our learnings are based on discovering the individual process pain points encountered by each of our clients. It helps us to customise our products to enhance these processes and provide solutions to pain points.

IMPLEMENTATION

Our implementation costs per client depends on the complexity of the project. Our cost model is based on the volume of documents digitised and the associated workflows that are created. The higher the volume, the greater the return on investment to the client in terms of time and effort saved.

IMPACT AND OUTCOMES

Impact and outcomes can be measured in terms of time saved. We specialise in automating time-consuming, repetitive tasks enabling our clients to concentrate on higher value activity.

Greg Tuohy
CEO

"Our products include streamlined customs clearance and document management software and accounts payable solutions. Experts in bespoke software development, we can enhance your digitization journey, smoothing the bumps in the road and streamlining the process."

OBJECTIVES OF THE PROJECT

To detect the **specific needs** and **lack of skills** in the textile industry to make the digital transformation possible.

To create a **virtual training programme** to provide the required knowledge and skills.

To test **transnational partnership** which can be sustained beyond the project to jointly face the common challenges of the textile industry.

**Technology is the enabler
and people are the leaders**
